During the procedure you may experience deep pulling, tugging, pinching, numbness or discomfort. Following the procedure, typical side effects include temporary numbness, redness, swelling, bruising, firmness, tingling, stinging and pain. Rare side effects may also occur. The CoolSculpting procedure is not for everyone. You should not have the CoolSculpting procedure if you suffer from cryoglobulinemia or paroxysmal cold hemoglobinuria. The CoolSculpting procedure is not a treatment for obesity. As with any medical procedure, ask your physician if the CoolSculpting procedure is right for you.

Patient results and experience may vary.

Patients shown are within +/- 5 pounds of their original weight unless specified.

The CoolSculpting procedure for non-invasive fat reduction is FDA-cleared for the flank (love handle), abdomen, and thigh. The CoolSculpting procedure for non-invasive fat reduction is available worldwide. FEAR NO MIRROR™

**WHAT YOU SEE
IS WHAT YOU LOVE**

**Fear no swimsuit, no tight t-shirt,
no form-fitting dress.**

When it comes to your reflection, you can be your own toughest critic. Even that favorite outfit can feel off-limits because of stubborn fat that resists diet and exercise. But the CoolSculpting® procedure shapes what you see without surgery or downtime, so you'll look great from every angle.

Clothes fit better, feel better, look better.

If you could wear anything you want, what would it be? Let us know on Twitter **#FearNoOutfit**

SEE JUST HOW SAFE WE ARE

Proven results without surgery or invasive procedures.

CoolSculpting® technology safely delivers precisely controlled cooling to gently and effectively target the fat cells underneath the skin while leaving the skin itself unaffected. The treated fat cells are crystallized (frozen), then die. Over time, your body naturally processes the fat and eliminates these dead cells, leaving a more sculpted you.

No surgery, no anesthesia, no downtime.

FDA-CLEARED, SAFE, AND EFFECTIVE

CoolSculpting is the #1 Body Sculpting Procedure²

Is it right for you?

 **coolsculpting®**

SCIENCE THAT LOOKS GOOD, TOO

Many of us have stubborn fat despite diet and exercise.

CoolSculpting® technology uses controlled cooling to target and kill only these fat cells.

In the weeks to follow, the body naturally processes the fat and eliminates these dead cells.

CoolSculpting results are long-term,¹ as treated fat cells are gone for good.

Results and patient experience may vary.

Before

After

Photos courtesy of Suzanne Bruce, MD

After treatment, targeted fat cells are eliminated for good. Untreated areas will have no change in fat cell distribution.¹

YOUR QUESTIONS, ANSWERED

QUESTION: How much does the CoolSculpting® procedure cost?

ANSWER: The price for CoolSculpting procedures varies depending on your areas of concern, the number of sessions needed, and your ultimate goals. Create a customized treatment plan with your provider that's tailored to your body, your goals, and your budget.

QUESTION: What does it feel like?

ANSWER: During your treatment, a gel pad and applicator are applied to the targeted area. Applicators that use vacuum will draw the tissue into the applicator cup. You may feel pulling, tugging, and mild pinching. Controlled cooling is then delivered to the targeted fat so you may feel intense cold but this sensation typically subsides within 10 minutes as the area becomes numb. Many people read, check email or even take a nap during their sessions. Afterwards, patients are usually able to return to normal activities.

QUESTION: Where does the fat go?

ANSWER: Once the treated fat cells are crystallized (frozen), the body naturally processes the fat and eliminates these dead cells. Once the treated fat cells are gone, they're gone for good.

QUESTION: Does it really work?
When will I see results?

ANSWER: Yes! The CoolSculpting procedure has a 95% patient satisfaction rate¹. Your provider will help you create an individualized treatment plan tailored to your specific goals. While some patients may see results as early as 3 weeks after their session, most dramatic results are usually seen 1-3 months after treatment.

QUESTION: What happens if I gain weight down the road?

ANSWER: Many people, after seeing the results from their CoolSculpting procedure, take even better care of themselves. However, if you do gain weight, you may gain it evenly all over your body, not just in the treated areas.¹
